EXPERIENCE

Decision Minds

Feb 2026 – Aug 2026

Data Engineer Intern

Puducherry

- Worked on the backend development of an Alert Management Platform for an enterprise project.
- Integrated Jira with the Alert Management Platform to streamline issue tracking and operational workflows.
- Worked with Snowflake for data warehousing, SQL query development, data loading, and data management.
- Assisted in the manual deployment of company applications across development and production environments.
- Contributed to frontend development by implementing UI enhancements and resolving bugs.
- Generated and qualified business leads using AI-powered tools to support the company's sales and business development efforts.
- Collaborated with cross-functional teams to troubleshoot issues, improve system performance, and ensure successful project delivery.

PROJECTS

YaliVox – AI Resume Builder & Auto Job Applier | React, Python, FastAPI, SQL, Netlify, Render | **Live** Jan. 2025

- Developed an AI-powered platform for generating ATS-friendly resumes.
- Built an automated job application system to streamline the job search process.
- Developed the frontend using React and deployed the application on Netlify and Render.

Enterprise Alert Management Platform | Python, SQL, React, Jira API, RBAC

May. 2026

- Integrated Jira with the Alert Management Platform for issue tracking and workflow automation.
- Developed Approval Management and Role-Based Access Control (RBAC) modules for secure user access.
- Worked with Snowflake, improved the UI, and supported backend development and deployment.

Quotex Trading Automation Bot | Python

Jun. 2026

- Developed an automated trading bot that analyzes candlestick patterns and executes trades based on predefined strategies.
- Automated market analysis and trade execution using Python, improving trading efficiency.
- Designed and tested the application in a local development environment with configurable trading parameters.

Minifypic.com | Next.js, React, Python, Google Cloud Run, Netlify | **Live**

- Developed an enterprise image optimization platform using Next.js and React for a responsive user interface.
- Built Python backend services for image compression and processing, deployed on Google Cloud Run.
- Deployed the frontend on Netlify, providing a scalable and efficient cloud-based solution.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, C, C++

Database: SQL, Snowflake

Tools: Git, GitHub

Web Technologies: React.js, Next.js, HTML5, CSS3

Cloud & Deployment: Google Cloud Platform (Cloud Run), Netlify, Vercel, Render

EDUCATION

Sri Venkateshwaraa College of Engineering and Technology

Nov 2022 – Jun 2026

Bachelor of Technology (B.Tech) in Computer Science and Engineering (CSE) - 7.3/10

Puducherry
